My favorite candy is

My favorite candy is

My favorite candy is probably Twix because its chocolatey and it has a little bit of Carmel in it

Gonne go milky way it's the perfect mix of milk and chocolate

Licorice cherry flavored

Snickers

Reese's

Hershey kisses because they just melt in your mouth like I don't know I can feel this huge release of dopamine whenever I pop one in my mouth, they're so sweet and easy and portable

Candy

Who doesn't like candy

Who was the last person you met that said they didn't like candy?

All around the world there are hundreds and thousands of different types of candy each with a different story behind its creation

Have you ever wondered how to make that candy?

Or wondered the origin behind it

Welcome to To Do The New

I'm Shelby

And I'm Zach

Trying new things can be absolutely eye opening

Each episode we will choose a different topic from our wheel of foreign and we'll go with that topic no matter what

This week our topic chosen was the creation of candy

First we'll get some opinions on what candies the best

Then we will try to recreate the most popular candies

After our collection of votes on what the best candies were we discovered the most loved candies in Carmel Highschool are Sour Patch kids, Gummy worms, and Milky ways.

So the first candy we are gonna try is Sour Patch kids

So take a sour patch kid

Give me a blue one

So we're gonna try them now

So the first instance its like really sour

Well I like them because they're like my favorite candy

I think they're overly sugary

You cant eat like more than 10 of them or else your teeth fell disgusting

They're really good I really like sour patch kids, they've always been one of my favorite candies

Okay so the second candy that we're tasting is the milky ways

Okay so I don't really like milky ways at all there's just a lot goin on

They're the candy that I eat when there's nothing else

Like on Halloween I'm not gonna choose that over a snickers

Its always the candy that left in the bowl that no one's eaten like almond joys but I'll eat those

And then whatever the thing is that's inside it

The Nougat

The nougat

I do not like that

I like it

I like 3 muskateers more because its mostly nougat

So the last one we're tasting is gummy worms

If I eat more than 5 of these my stomach feels like its full of gummies stuff and its just like ugh

I always been a big fan of gummy worms because Ive always liked juice and stuff and they remind me of juice

It kind of tastes of medicine

It tastes like someone made ibuprofen gummies

So we tried the medicine flavored one

The orange is a little bit better

It gets better the more you go

So let's jump right in and make some candy

So the recipe we're making right now is for homemade milky ways so the first thing the recipe says is to put the chocolate candy coating in the bowl so we're putting chocolate spread and the shell coating in the bowl

Oh that's a lot

Do you wanna put a little more

Is that enough

How much does it say 6 ounces

So we're just gonna keep mixing that

Okay we're done with that

So it says coat the bottom of the pan, We're using an 8 by 8 inch pan

So we need a lot

Holy cow what happened to this freakin spoon

In another microwave safe bowl we're supposed to mix together the fluff and the chocolate spread, So it said to add a lot of fluff to the chocolate spread the whole jar

Just use a normal spoon

That should be enough right

This hasn't gotten hard yet so we're continue stir

Wow that is hard

That is thick, thicker than a bowl of oatmeal

Just gonna keep on stirring

Is it thick with two c's

It's thick with 3 c's

And then that should... Oh my god that actually looks nougaty

I know it does

Holy cow

And it smells really good

So then you have to microwave that for 30 seconds

Okay so we're fresh out the microwave

So we're melting the caramels with the milk so we need some milk

Do I put the caramel or the milk in first

Caramel

Oh my god why did you pour that many

These look like cereal

I could eat that straight up... And when we put the milk

And then we put the milk, 2 to 3 tablespoons of milk or cream

How do we need 7 ounces of caramel but only 2 to 3 teaspoons of milk?

So this whole time you're supposed to continue to stir the mix of the chocolate spread

That was 2 minutes

Yeah

You're supposed to spray the bottom of the pan

The next step is to pour the nougateness

Look at how well that turned out

I know it looks really good, and then we're gonna pour that into the mixture

So now we're gonna take the caramel and pour it over the mixture before we put it into the fridge

Okay so we just put the mixture and the milky way bars into the fridge for 20 minutes

So lets take it out of the parchment paper, I'm gonna cut it into little pieces and try not to cut my finger off

Its really melty

Woah it is really melty

Okay go, it tastes really good

Its actually not bad at all, it kinda tastes like a candy bar you'd get at summer camp or something

Yeah it tastes like ice-cream sandwiches

Earlier I said I hated milky ways but I love this version of milky ways and its cold

I'm feelin it

I actually really like it

Overall throughout this journey of making candy it was a strong test that I really wouldn't have tried before but I think it was a good experience

Yeah it was pretty difficult but it ended up with a pretty good product

I thought it was an awesome product

It tastes really good

It tastes amazing
