

Speaker 2:

What's up everybody this is our first episode of out of order i'm Kaiah Weisnaur with my co host.

Speaker 1:

Alexa Febreze high.

Speaker 2:

We're both eleven great comma high school students.

Speaker 1:

At the nine to twenty three it W. H. J. E. studios.

Speaker 2:

We're gonna be listing off different different riddles see if we can figure it out while also giving you will interesting little tidbits in between.

Speaker 1:

Out of order is a show where we talk about pretty much anything but today's episode is about the history of rentals and riddles there self so I hope you can all join in.

Speaker 2:

Then there.

Speaker 2:

Frankly be.

Speaker 2:

We have a real you're supposedly belongs on the claim and so on this one I don't think it is.

Speaker 1:

But we're going to start reading in anyways okay it states this is long and hard to understand so pay attention man is framed in killing his mother and her for a car accident before he sent to jail the imposter comes to him and told him not to do it out of anger he killed him and search resumes to find time machine he decides to use it to save his mother and clear his name all with a little help from the man that ruined his life when he is in jail he considers the man's words and thinks what he does might disrupt the time space continuum he changes his mind.

Speaker 2:

But.

Speaker 1:

Something horrible Kerr's something even worse than what you can even imagine.

Speaker 2:

What a story originally thought it was him going back in time to like.

Speaker 1:

Stop himself you know that trope.

Speaker 2:

But maybe aliens show up and it's like.

Speaker 1:

It's late.

Speaker 2:

Guardians of the galaxy or something I don't know if it's more horrible than I can imagine them why would I even try to imagine.

Speaker 1:

I don't know I mean you see the problem with this riddles there's there's so many like what ifs and like what is it says like the imposter visits him and tells him to do it but we don't know what it is.

Speaker 2:

Not to do it.

Speaker 2:

Maybe he was like.

Speaker 2:

He went back in time to be like don't try to save your mother but the dude also changed his mind in jail so I don't know I mean this will be the first time like somebody actually listen to their future selves.

Speaker 1:

And had a.

Speaker 2:

Time machine.

Speaker 1:

The imposter visits him and told him not to do it.

Speaker 1:

Out of anger he kills him and searches them to find a time machine.

Speaker 2:

We it doesn't specify who is who.

Speaker 1:

Yeah so.

Speaker 2:

He kills woman searches them to find a time machine he decides to use it to save his mother and clear his name all with a little help from the man.

Speaker 2:

Does he get killed by his past self or something wait no that doesn't make sense since he's in jail late.

Speaker 1:

Speaker 2:

What.

Speaker 1:

Okay so look.

Speaker 1:

It says before you send the jail the imposter visits him and told him not to do it so what if it's like this is a him from the future with a like a time machine going back in time telling himself not to do it.

Speaker 1:

Make it so that he actually did kill his mother.

Speaker 2:

That's what I've been saying.

Speaker 1:

I thought you were like there's a guy coming back in time to some random person going back in time it like an act the person who actually killed his mother and tell him not to kill him right now.

Speaker 2:

Lay there's only one him I think in this story it is show the answer I think we.

Speaker 1:

The universe is just for aid.

Speaker 2:

That's a big cop out what okay.

Speaker 1:

An ironic twist the man brings the destruction he hoped to an end in a president a time paradox the man was supposed to go back in time to save his mother he steals a car to try to warn her but his Dick termination to savor causes him to speed a kill as mother.

Speaker 1:

An example of the self fulfilling paradox he survives the incident and travels to the time obtained the time machine he wants his past self not to go back in time but thinking it's to assure his mother's death he kills his future self thinking about his future self words he doesn't go back in time does not allow the paradox took place in the store the very fabric of the.

Speaker 1:

That makes sense.

Speaker 2:

Yeah but.

Speaker 2:

The thing is with time is that there has to be a first.

Speaker 1:

Of.

Speaker 2:

Not there's gonna be a first time line that doesn't have.

Speaker 1:

Whatever time traveler coming back in saying don't do it.

Speaker 2:

There's gonna be a first if you believe in the multiple timeline thing maybe would have a paradox I don't know I'm not that educated.

Speaker 2:

But I always found it weird that nobody use common sense and just.

Speaker 2:

Didn't do it.

Speaker 1:

Like in movies and stuff.

Speaker 1:

I.

Speaker 2:

Like.

Speaker 2:

If you went.

Speaker 1:

Back.

Speaker 2:

In people always say if I could go back in time I would go and kill Hitler or something like that.

Speaker 1:

Than a bunch of things would be different.

Speaker 2:

Yet we one have Volkswagen.

Speaker 2:

Is like there is another thing yeah it was like a **** car.

Speaker 2:

Hitler wanted it created for his soldiers.

Speaker 1:

I didn't know that.

Speaker 2:

Yeah one of one of the things was like if your mom and your dad.

Speaker 2:

Lake.

Speaker 2:

Created you and votes wagon then you went back in time and killed Hitler who killed Hitler.

Speaker 1:

Which means you were created creating time paradox itself.

Speaker 2:

Right exactly unless you jump to a different time line killed that time when Hitler and went back to your own where Hitler still exists.

Speaker 1:

So if he never went.

Speaker 1:

To that time.

Speaker 1:

That means his rather never died he was never in jail that's why the universe is destroyed.

Speaker 2:

Right.

Speaker 2:

Or.

Speaker 2:

Time doesn't care.

Speaker 2:

I don't know there's always things about the universe doesn't want you alive or something like that it's like the universe is an inanimate object it doesn't care.

Speaker 1:

Yeah we don't yeah we don't know.

Speaker 1:

There's like no way of telling what would really happen because like if he stops with his mother's.

Speaker 2:

Okay I got I got I got lost little it's going to the next year okay.

Speaker 1:

You just confuse me like a lot.

Speaker 2:

Lake for real.

Speaker 2:

All right.

Speaker 1:

This is the very long one.

Speaker 2:

So pay attention okay this was longer than the last one I don't think the last one was longer.

Speaker 1:

This once.

Speaker 2:

A man puts on a clean shirt every night before bed on the first night he puts on a blue shirt he then sleeps for five hours every hour more he sleeps.

Speaker 2:

Every hour more he sleeps than the night before okay so he sleeps an hour more than the night before so he would like.

Speaker 2:

The next night he would be sleeping six hours.

Speaker 1:

Yeah.

Speaker 2:

He put on different color sure the next night according to the scale blue black red green white pink orange brown purple yellow gray neon green tan until.

Speaker 2:

Everyone hour less he sleeps than the last night he put on different color sure.

Speaker 2:

A different color sure the next night going backwards on his scale.

Speaker 1:

So he slept for six hours that one night then if you.

Speaker 2:

Slept five hours for that night he would act to blue yet for the day.

Speaker 1:

For.

Speaker 2:

Okay.

Speaker 1:

As.

Speaker 2:

If he were to wear blue okay different culture than it going backwards if he were to wear a blue shirt because he's let more hours than last night.

Speaker 2:

He does.

Speaker 2:

If it was because he slept less hours than the night before he skips it where the chill sure instead.

Speaker 2:

He goes backwards on the scale goes to blue but would not wear blue sure he still counts blue in going.

Speaker 2:

It is going backwards on a scale the second night the man wears a blue sure because he did not sleep anymore or less hours than the last night the man sleeps for six hours that night the next night he sleeps for five hours nine number four he sleeps for eight hours.

Speaker 2:

The next night he sleeps for seven hours the next night he sleeps so well he sleeps for eleven hours.

Speaker 2:

The name number seventy stays up so late that he only sleeps for four hours the next night he's so tired wait he Sir tires you sleep for eight hours the next night he sleeps three hours again then I number nine or ten sleep for fourteen hours because he's sick since his lips along the last night.

Speaker 2:

He only sleeps for seven hours.

Speaker 1:

For.

Speaker 2:

The next night he is a little bit tired so he sleeps for eight hours and after that he had to do so much work that he only slept for five hours next network they let him out early in his life for nine hours next a separate hours and the last night the man did he slept for ten hours the next night you put on different culture according to a scale but the next night he randomly picked a shirt at one night will the man where Blueshirt again.

Speaker 1:

Tuesday.

Speaker 1:

Okay.

Speaker 2:

With it.

Speaker 1:

What is of the week.

Speaker 2:

Two.

Speaker 1:

Two.

Speaker 2:

Tuesday how do you get to this day.

Speaker 1:

I was kidding because there's no days of the week and.

Speaker 2:

Speaker 1:

At what night will the made.

Speaker 2:

For five hours is next.

Speaker 1:

He randomly.

Speaker 2:

I you know what.

Speaker 1:

Will use it for ten hours so he'd go backwards so blue.

Speaker 2:

The next night he said randomly picked a shirt one night while the man it's going to be something like two days since he picked it randomly.

Speaker 2:

Doesn't matter what he did at all since he'd randomly picked a shirt.

Speaker 2:

Right.

Speaker 1:

This is kind of confusing to me.

Speaker 2:

Like.

Speaker 1:

There's so many like this night he went for fourteen hours NXT went for five the next to it for eight so it's like.

Speaker 2:

The thing.

Speaker 2:

All of his data.

Speaker 1:

That he did.

Speaker 2:

Is a relevant now since he.

Speaker 1:

Randomly picked a shirt.

Speaker 2:

Right.

Speaker 2:

So either the answer is going to be today.

Speaker 1:

Or it's gonna be.

Speaker 2:

Never or something like that.

Speaker 2:

Since he.

Speaker 1:

Put the next week he removed the shirt so it could it could have we wouldn't know because he randomly picked.

Speaker 2:

Yeah all the information they just gave us does not matter.

Speaker 2:

You.

Speaker 1:

Night never tour.

Speaker 2:

What wait what.

Speaker 1:

Wait what.

Speaker 2:

Feeling.

Speaker 2:

Five hours knoll moon since blue is supposed to be five hours.

Speaker 2:

Any changes is sure according to how much.

Speaker 1:

I thought about like after that as you know a man like after like a lost.

Speaker 2:

Then them lose lose.

Speaker 1:

Bamboozled.

Speaker 2:

Yes.

Speaker 1:

I'm so mad.

Speaker 2:

Later this.

Speaker 1:

That's what it was I it's like there's so much going on it's hard to think about it.

Speaker 2:

I'm mad.

Speaker 2:

Hi everybody that's all we have for today.

Speaker 1:

Im Kay Weisnaur and I'm Alexa Febreze be watching out for our next episode movie reviewing cult classics and thanks again for watching this episode of out of order.
